# Acubiz Single Sign-On

**acubiz**

## PRODUCT DESCRIPTION

## Let Acubiz SSO simplify the login process

Single Sign-On (SSO) is the easiest and most secure way to manage the login process in Acubiz. SSO can both be used for Acubiz' web and mobile application. The biggest advantage is that the user only has one login – the same login method as the user also make use of for internal systems. At the same time, the company achieves more control and increased data security, since the login information is managed centrally and internally.

## CONFIGURATION

## How does Acubiz' SSO service work?

The configuration of SSO requires access to the company's Identity Provider (IdP) platform/infrastructure. The important thing is that the company's IdP platform supports SAML 2.0. The IdP platform, such as Microsoft AD FS or Microsoft Azure AD, makes it possible to centralize the identity and access management, which helps to better secure the IT environment and users.

If an employee, e.g., leaves the company, the company can disable or delete the employee's local IdP user. The employee is then automatically logged out of all the systems or solutions that are synchronized with the company's IdP – including Acubiz. It improves both the data security and the control for the

### Did you know that...?

- It's possible to save up to 80% by digitizing and optimizing your expense processes with Acubiz.

- Acubiz is available anywhere and anytime from both mobile and computer.

- Data security is our top priority and we are ISAE 3402 Type II certified.

Conversely, if the employee is still found in the company's IdP and trying to log in to Acubiz, the employee doesn't need to enter login credentials, as the employee will be verified from the IdP. Unless the company's own policies and procedures prescribe otherwise.

The use of Acubiz SSO is beneficial for both the user and company:

### Benefits for the user

✓  Don't have to remember several passwords

### Benefits for the company

✓  Improved data security

✓  More control since users, roles and identities are managed centrally and internally

✓  Time savings – no inquires about forgotten passwords
